ONE-STOP TRAINING AND HIRING CENTER

MidAmerica Delivers is committed to a comprehensive workforce development strategy through the long-term investment in its new Center of Excellence.

The Center is dedicated to providing access to the latest technology, offering to-tier skills training and showcasing career opportunities among our employers. It is the product of a vision cast to ensure companies at MidAmerica have a quality workforce and job-seekers can develop in-demand skills. Additionally, the Center offers advanced technology to assist our employers with research and development and product development.

MidAmerica has taken a multi-tenant approach that leverages the expertise of partners to create a tailored approach to workforce development.

WORKFORCE TRAINING AND DEVELOPMENT

MidAmerica partnered with **Northeast Tech's** business and industry team to assist with the creation of applicable and relevant training programs. Leveraging the knowledge of subject matter experts from MidAmerica companies', programs are designed for specific purposes and outcomes. Incumbent employees, job seekers and prospective employees can develop in-demand technical skill sets. From Industrial Maintenance to Advanced Manufacturing Technologies, Northeast Tech meets the need.

PLACEMENT AND CAREER SERVICES

MidAmerica developed a strategic partnership with **Action Group Staffing**, the anchor tenant in the Center, to provide ease of access to employees and to jobs. AGS is an excellent partner providing employment services for employers and job-seekers. AGS implements innovative staffing solutions that include employee training, alternative worker pipelines, and transportation services.

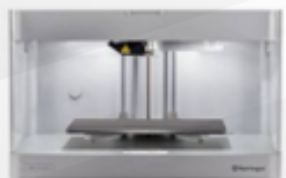

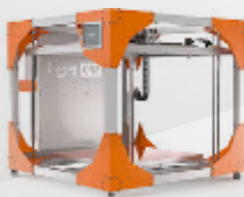

RESOURCE CENTER FOR ADVANCED MANUFACTURING PROGRAM

MidAmerica partnered with **Cherokee Nation Aerospace and Defense** in the establishment of an advanced manufacturing program aimed at educating and training workers in high-end manufacturing technology and processes. Not only will the Resource Center provide education and training services, but it will be accessible to MidAmerica companies for research and development. To learn more, inquire about the R-CAM membership program.

Featured Equipment Includes:

- Haas CNC Machines: VF-2SS w/ TRT100, Haas ST-15Y, Haas ST-10, Haas Minimill
- Mitutoya Coordinate Measurement Machine
- Markforged 3D Printers: Onyx One (x2), Mark Two (x2)
- Bigrep ONE Large Volume 3D Printer
- Kioke 4' X 8' Plasma Cutter

YOUTH PROGRAMS

The Center of Excellence is home of the Mayes County FIRST Robotics Team (MCROBO) and Pryor High School's Advanced Manufacturing Program. These programs provide area high school students the opportunity to learn valuable skills in computer aided drafting, electromechanical technologies, controls programming as well as critical soft skills. The robotics team competes in regional competitions with other teams from across the country.

FUTURE DEVELOPMENT

MidAmerica is only getting started with the new Center and has plans in place to further develop its offerings. Future programs will include an automation and control laboratory to replicate the latest technology applications.
